

Early College

Students Can Earn College Credit While Finishing High School

National University Virtual High School (NUVHS) has partnered with National University to offer eligible high school students the opportunity to take general education college courses before they graduate – **at a dramatically reduced tuition rate.**

Partner with NUVHS to offer your students the opportunity to:

- Enroll in select 100- and 200-level general education college courses
- Attend flexible college classes 100% online, while completing high school
- Receive reduced tuition of \$600 per class (a \$1,665 value) in an accelerated one-course-per-month format, applicable to online classes only
- Transfer college credits to other higher education institutions

Earning college credit prior to high school graduation contributes to accessibility, readiness, and financial savings towards a degree or certification program in college.

National University is a WSCUC-accredited nonprofit university.
Eligibility is determined by a minimum GPA by grade level.
